My Travel with IGNOU

Any teaching Institution construed to be a temple in India. In the present scenario where Socio Economic transformation is going on a fast pace and also the required paucity of time has become a question to the present generation, to also think about the regular courses to be attended in the college or university is difficult.

But IGNOU through its distance education mode helped their students in fulfilling their dreams. I am a graduate of B.Sc.(Computer Science) and because of the family constraints cannot be continued with any organization and settled down as a home Manager. When I browsed about IGNOU Programmes and flexibility in offering the Programmes, I was fascinated and enrolled with DECE and wanted to start my carrier as a play school teacher. Rather had a dream of starting my own playschool, IGNOU helped me pursue my dream, it made to start my career in a way I didn't think. The Principal of my kids school was impressed when interacted in one of the orientation programmes and offered the job in her prestigious Institution (Brahm Prakash DAV School is one of the famous run by the DAV College all over India) as a Pre-Primary In-charge and a Primary Teacher.

My journey with IGNOU did not stop here! I also enrolled for the MA (Psychology) to climb the ladder of my profession as a counselor to help many kids and their parents who are facing many difficulties, especially where in the case both parents are working and unable to spend quality time with their kids.

I would like to say thanks to IGNOU for its wide network throughout India in providing the quality education with a motto reaching to unreached. I am highly grateful to IGNOU for providing the good/remunerative career to its students.
